

This month we're including information about the Agfa CR 10-X Digitizer

One of our most popular CR Digitizer

CR 10-X

Your entry to digital
quality imaging

For our facilities that would like to add CR we carry the Agfa CR 10-X Digitizer with Musica². Adding this equipment to your existing radiographic system will eliminate your need for x-ray film, film processor and processing chemicals. Images are available at ANY workstation on the clinic's network and also an Apple iPad for viewing.

Go to our website for more information on the Agfa CR 10-X and Centura X-ray, Inc.

MUSICA²

37 radiologists in 14 different locations worldwide compared the image quality of standard processing to MUSICA². 95% rated the quality of the images processed with MUSICA² "equal" to "excellent" compared to standard processing. 100% of the MUSICA² observations were rated as diagnostic

34 plates per hour
throughput for 35x43cm
(14x17").

"Robust yet easy to
install & maintain"

Also available with the CR 10-X
is a 16GB Apple iPad II for you
to view images with clients
and/or patients. →

The affordable, compact
CR 10-X Digitizer is
designed as an ideal
solution for individual
offices. Offering a cost-
effective entry into digital
radiography without
compromising on image
quality

"Fits in small spaces and is suited
for mobile applications"

centura X-ray
